## STOP TO EXPORTS OF LUXURY GOODS TO RUSSIA

300 euros. This is the threshold above which it is forbidden to export luxury goods to Russia, as established by the EU's fourth package of restrictive measures against Russia, in force since March 16. Stop, therefore, to expensive pieces of clothing, jewels, perfumes, beauty products, food products and, of course, wines and spirits, caviar and truffles. Luxury cars (more than 50,000 euro) and electronic devices (over 750 euro) are also in the list.

In the **TRENDING NOW** section we aim to present some of the most recent product launches in the Italian retail market - or that are set to debut soon - as well as products that have been warmly welcomed by customers because of their quality and innovative features.

In this issue of Italy for Asia the focus is set on jams and dairy specialties.

As regards **jam**, Italian manufacturers pay more and more attention to authenticity - by choosing high quality ingredients, and naturalness - by avoiding preservatives and added sugars. In the dairy sector, the increasing demand for convenience and ease-of-use has led to the creation of small-sized **cheese snacks**, perfect for out-of-home consumption of both kids and adults, and source of an all-natural energy boost. But first, let's discover a new range of shelf stable, 100% vegetable and definitely innovative **soups**.
