EU PARLIAMENT SAYS YES TO A DISTINCTION BETWEEN ALCOHOL 'CONSUMPTION' AND 'ABUSE'

On the past 15th February Members of the European Parliament in Strasbourg have backed amendments to a range of recommendations put forward by the Special Committee on Beating Cancer (BECA). The original report defined any form of alcohol consumption as a risk factor for a range of cancers and chronic diseases, alongside tobacco, poor nutrition, a high body mass index, a sedentary lifestyle, and environmental pollution. With this vote, however, MEPs favored an amendment to the report that supported the key distinction between consumption and 'harmful' abuse of alcohol. MEPs also voted against the imposition of health warning labels similar to those currently shown on cigarettes, in favour of messages that encourage moderate and responsible drinking.

FIorentini LAUNCHES THE NEW CORN CAKE WITH SALTED CARAMEL

The Italian producer of bread substitutes and snacks has widened its Choco Mais line of sweet-savory cakes with a new Salted Caramel version. Free from gluten, sesame and peanuts, the new snack is available in a 68 gr pack.

PLANT-BASED FOOD: A 458 MILLION EURO BUSINESS IN ITALY

Between September 2020 and September 2021, sales of 'alternative' products in Italian grocery retail experienced a 17% growth, for a turnover of 458 million euro (source: Iri), equal to about 0.6% of all food sold in the channel. Italians are mainly fond of plant-based drinks (chosen by 35% of Italian households according to GfK) and gastronomy like burgers and finger food (32%). All food categories - among fresh, frozen and ambient - have experienced strong growth, in some cases up to 30%. Sales of plant-based drinks generate 220 million euro (about 11% of total sales sold in grocery retail). Plant-based burger and patties are worth 115 millions. Italy has thus become the fourth largest European market for plant-based food, on a value basis.

RIO MARE (BOLTON GROUP) IS READY TO LAND IN THE US

After Canada, Bolton Group is ready to enter the United States. The multinational company - generating a 2.8 billion euro turnover - owns food brands like Rio Mare and Simmenthal (preserved fish and meat). Rio Mare will be the first to enter the US. "The brand enjoys great appreciation abroad, especially in Germany, Eastern Europe and, recently, Canada", the executive president Marina Nissim explained. "Now, we will launch it in the US and in the meanwhile we will widen the range of pesto products with tuna." And in the future? "We are not going to enter the stock market", she adds. "We are and will remain a family company. Brands are important, but our greatest richness lies in people."

AZIENDA UGGIANO PRESENTS 'GOVERNO ALL'USO TOSCANO'

The Uggiano winery presents its latest arrival: 'Governo all'Uso Toscano'. A red wine with an intense color and a fruity aroma that satisfies international taste preferences.

"The ancient 'Governo' technique, that is to say a slow refermentation of the freshly drawn wine with the addition of slightly dried grapes, gives the wine vivacity and roundness," the winery from S. Vincenzo a Torri, in the province of Florence, explains. "With this new addition Uggiano further widens its range of Tuscan wines with an excellent quality / price ratio and looks with optimism at the great events that will take place in 2022 - Wine Paris, Vinitaly and Prowein - where the new vintages of wines from Tenuta Aquilaia, a beautiful estate in the heart of the Maremma acquired by Uggiano in 2019, will be presented."

SALES OF PRE-SLICED PROSCIUTTO DI PARMA INCREASE BY 6% IN 2021

Excellent results for Parma ham in trays in 2021, with sales up by 6% and exceeding, for the first time, the record number of 2 million sliced hams for over 100 million packs produced. In Italy, the growth rate reached 12%, for about 30 million packages sold. "A trend destined to last," according to Alessandro Utini, president of the Parma Ham Consortium. "On global markets we will work in order to further consolidate these brilliant results, also through promotional initiatives within major European grocery retail chains". In 2021, 72 million pre-sliced Prosciutto di Parma trays were exported (+3% on 2020). Europe accounts for 86% of this business, while the remaining 14% comes from extra-EU countries (with the US as the main market).

FERRERO'S TURNOVER REACHED 12.7 BILLION EURO IN FINANCIAL YEAR 2021

Ferrero International, parent company of the Ferrero Group, closed the year with a consolidated turnover of 12.7 billion euros, rising 3.4% compared to the previous year. At that date, the Group consisted of 107 consolidated companies worldwide and 32 production plants. Its products are distributed in over 170 countries. Despite the uncertainties caused by the pandemic, the Group has seen sales of finished products grow in specific markets such as France, Germany and China. Some iconic brands like Ferrero Rocher, Kinder Bueno, Kinder Joy and Kinder Cioccolato performed very well, while new products were launched: see Ferrero Rocher and Raffaello ice creams. The Group supported its technological development strategy by expanding its production capacity, with investments of 839 million euros.

In the **TRENDING NOW** section we aim to present some of the most recent product launches in the Italian retail market - or that are set to debut soon - as well as products that have been warmly welcomed by customers because of their quality and innovative features.

In this issue of Italy for Asia the focus is set on one macro category: that of **ready-to-eat**. Is it a multi-purpose ingredient, useful for preparing some party-ready quick appetizers, or a complete meal for working people, with little time but not willing to compromise on taste or on the healthy side of a freshly prepared dinner.

Here you will find some interesting solutions inspired by the ingredients and tastes of the Italian cuisine.

AROMATICA

FROZEN MANIA

The Pandemic pushed the sale of frozen foods both in Italy and worldwide. Due to the fact that they ensure safety, convenience, that they can be stocked up and sent all over the world thanks to a very long shelf life. Hence, Italian companies have launched new interesting products, especially in the bakery and ready-to-eat sector, and in the dairy and confectionery industries too.

ITALPIZZA
